Zach Bailey

Birmingham, AL

EXPERIENCE

Seeking to solve technical challenges affecting platform teams while expanding their toolkits and the reliability of their cloud infrastructure.

ThreatDown
Platform Engineer 12/2023 – Present

- Provided technical expertise in driving the platform development lifecycle while supporting Managed Services.
- Designed new back-end services to support security operations while managing rulesets and filters for the platform.
- Worked with Engineering to review, test, debug, and resolve technical issues with platform implementation.
- Migrated apps from Nutanix to AWS in collaboration with SRE to ensure improved availability of analyst tools.
- Created new processes for code reviews, security auditing, and updated the change control process for the platform.

Malwarebytes
Senior Tools Developer 7/2022 – 12/2023

- Authored documentation for all scripts, integrations, and workflows for the Managed Services security platform.
- Became SME for Google Cloud Platform's SecOps capabilities and worked with SRE to identify RCAs for outages.
- Wrote reusable Python modules to expand local POCs into finalized features using the platform SDK.
- Utilized Slack bots to monitor platform health and code deployments, collaborating with SRE for outages.

Malwarebytes
Tools Developer 2/2022 – 7/2022

- Designed our first security service by creating documentation in Confluence and tracking key objectives in Jira.
- Collaborated with Engineering to implement data ingestion and worked alongside QA for E2E testing before GA launch.
- Created playbooks to handle triage of alerts, reducing manual analysis volume and identifying threats for review.
- Deployed services to servers hosted on Nutanix to assist the team with automated tasks.

Cofense
Threat Analyst 3/2020 – 2/2022

- Improved investigation pipeline using scripts to reduce triage time while delivering artifacts to the Threat Intelligence team.
- Collaborated with Cloud Engineering to design VMware templates to be deployed on demand through Jenkins.
- Implemented and maintained dashboards in Splunk and Kibana, while identifying threat trends for customers.

EDUCATION

University of Alabama at Birmingham
Bachelor of Science; Major in Digital Forensics (Computer Science / Criminal Justice) ***2019***

PROFESSIONAL CERTIFICATIONS

Amazon Web Services (AWS)
Cloud Solutions Architecture ***2024***

Google
Chronicle SOAR Developer ***2024***
